

FAQ RGBW SMARTLIFE PATIO LAMPS

- 1 Is a remote control available, or control only by phone/tablet? **No remote here, only control by phone or tablet**
 - 2 If you do not have your phone/tablet with you, is there any way to turn on the lights **First, you need to use phone or tablet to download TUYA APP and connect the string successfully, then to use the string. However, once your string is connected successfully and works normally, the string will be still work even your phone or tablet away from the wifi range. Also there is a button on the adaptor so that you can control the functions by this button. Only control the string functions by this button, WITHOUT on/off function on it.**
 - 3 What if the installation is outside of WiFi range?
 - a. Can they be set up and still turn on via a schedule? **Once the string is working normally, then no problem even your phone or tablet away from the wifi range, control the functions by the button on the adaptor. Also you can set on/off timer on the TUYA APP in advance.**
 - b. Are they also Bluetooth and can be controlled locally by a phone? **Yes, once the string is connected successfully, you can close the TUYA APP and then control it by your phone bluetooth**
 - 4 Is there a on/off button on the string? **No on/off button on the string, the button on the adaptor can only control the functions.**
