- Ok,google, turn on the bedroom light. OK,google, brighten the bedroom light.

FAQ About WiFi Connection:

- 1. How to Connect WiFi of Smart Device with the Mobile?
- This device can only support 2.4G but not 5G so please confirm the mobile and WiFi router under 2.4G.
- If there is both 2.4G & 5G in router, you can access the setting of router to shut off 5G network firstly.
- (1). Please keep the devices & mobile close to the WiFi router as possible, because the signal of 2.4G is easily to be interfered;
- (2). Also, if the set channel of router is same with others, in this case, it looks strong signal

but in fact it will bring the false signal; You can switch the transmission channel from 1~11; (3). Another factor is that the terminal devices connected with the router reach maximum.

- 2. How to Enter AP Mode of Smart Socket? Long press 8s to blink rapidly, then continue to long press 8s to enter slow blink mode for AP connection.
- 3. If it's still unresolved, what am I Supposed to
- If it's still unresolved from the above FAQ, please try to share the WiFi Hot Spot from one mobile to another, and also connect the device through this WiFi Hot Spot, if it can be

connected, it proves that the smart devices run well but might the problem from router. Otherwise, it's the problem from the product.
